MINER'S TRAIL KÜHTAI – OCHSENGARTEN – HOCHOETZ

A hiking tour on the **Miner's Trail** is of magnificent uniqueness. A landscape

of natural beauty mixed with alpine pines between soaring mountains and

further endemic high alpine plants is waiting for you. During summer only

sheeps and their shepards are living in this lonely but wonderful alpine area.

But it wasn't always that kind of a quiet place. 350 years ago mine workers

faced harsh conditions in this high altitude. Up to 450 miners were searching

for copper, galenite and pyrite in this remote area. Discover more about this unique landscape, the mysterious Pochersee and the people who have tried

to cultivate this region since centuries.
