2027 SNOWBOARD, FREESTYLE, AND FREESKI WORLD CHAMPIONSHIPS

MONTAFON AND KÜHTAI 06. – 21.03.2027

The next Snowboard, Freestyle, and Freeski World Championships will take place in Montafon from March 06–21, 2027.

The halfpipe competitions – training, qualifying rounds, and finals – will be held in Kühtai from March 03–09, 2027.

A top event for spectators as well.

TOP EVENT

Building a halfpipe that is 180 m long, 19 m wide, and 6.4 m high requires not only plenty of snow but also a great deal of experience. Kühtai has both, which is why the World Championships organizers are partnering with Kühtai, and why these competitions will take place in Kühtai rather than in Montafon. Since the 2012 Youth Olympics, spectacular events have been held time and again in the Kühtai halfpipe. Optimal conditions are also expected at this World Championship to inspire impressive performances from the world's best riders.

KÜHTAI – A SUSTAINABLE RESORT

THANKS TO MANY INITIATIVES,
KÜHTAI KEEPS ITS ECOLOGICAL
FOOTPRINT AS SMALL AS POSSIBLE

CLEAN ELECTRICITY DIRECTLY FROM KÜHTAI

The nearby Sellrain-Silz hydroelectric power station supplies the winter sports resort of Kühtai with 100 percent clean electricity and produces a total of around 13 percent of Tyrol's electricity demand. For the entire local power requirement of the highest ski resort in Austria with all accommodations and railways only a small proportion, about half a percent, is needed.

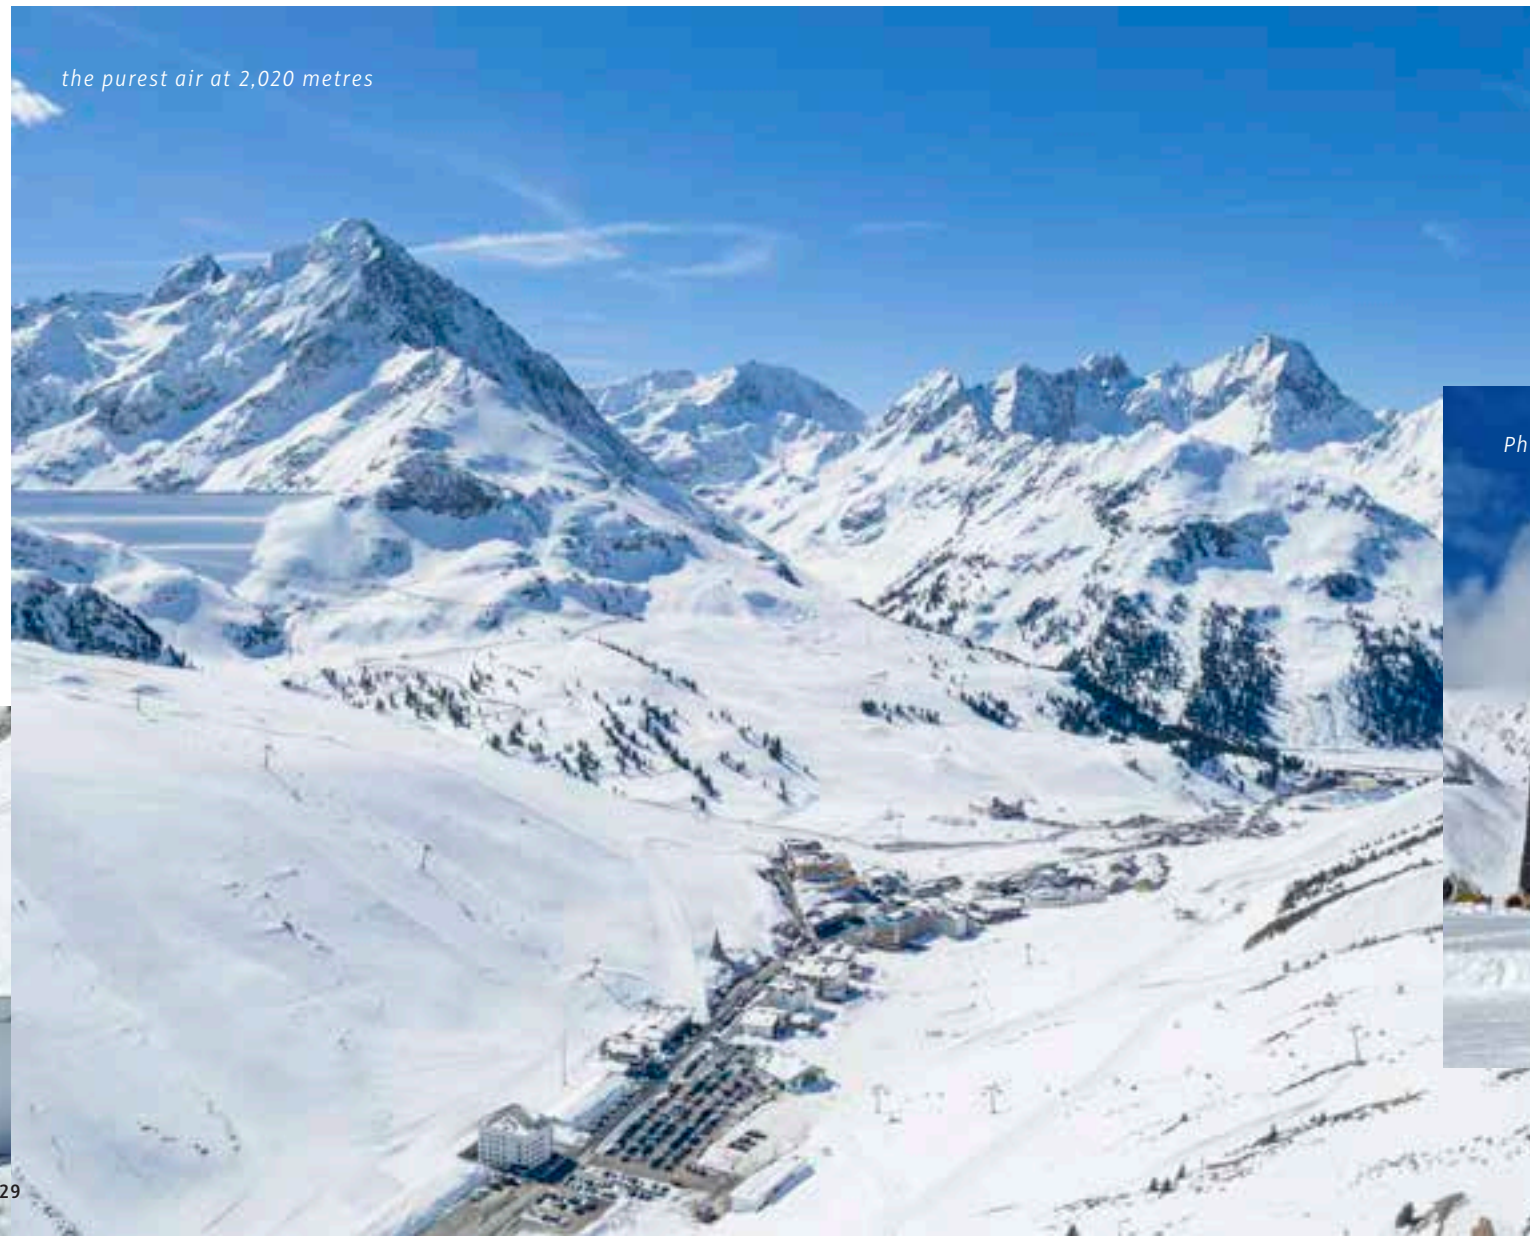

BIODEGRADABLE FUEL

The Kühtai snow cats drive with synthetic, biological biodegradable fuel derived from natural gas and has a positive effect on air quality.

photovoltaic system

the purest air at 2,020 metres

SUSTAINABLE HEAT THROUGH BIOMASS

The district heating plant uses exclusively local biomass from a radius of 50 kilometres and thus replaces a fuel oil quantity of about 1,000,000 liters per year. The heat generated is distributed via a 3.5-kilometres-long pipe network to 90 per cent of all businesses in Kühtai throughout the year. This continues to guarantee the high air quality of the training location Kühtai.

HIGHEST CHARGING STATION IN TYROL

The charging station, which was built in cooperation with the utility company TIWAG, supplies electric vehicles with eleven kilowatts per hour at four charging stations at 2,020 metres above sea level in the middle of the village. In addition, many of the accommodations in Kühtai also offer their house guests their own charging station.

Biomass heating plant

A PHOTOVOLTAIC SYSTEM PROVIDES SUSTAINABLE ENERGY

With its significantly expanded photovoltaic system, Kühtai is taking another step toward a sustainable energy supply. The new alpine PV system, with a capacity of 2,000 kWp, generates renewable electricity for the ski resort and plays a key role in meeting local energy needs in an environmentally friendly way.

Thanks to its unique alpine design, the system is specifically tailored to high-altitude conditions. A major advantage: Especially during the winter months, when energy demand in the ski resort is particularly high, a significant portion of electricity production can be achieved. This means solar energy is produced right where it's needed—directly in Kühtai.

And the pass at 2,020 metres opens up a view of overwhelming, untouched nature – in addition, toll and vignette-free.

There are many great photo opportunities during and after the drive on the High Alpine Road – whether comfortably by car, by motorbike or sporty by bike or mountain bike. For example at the Längental reservoir, where you can reach the dam wall directly from the car park in a few minutes or circle the entire reservoir in just 45 minutes. Even more impressive is the ride on the DreiSeenBahn up to 2,410 metres and then on via the Höhenpanoramaweg to the Finstertal reservoir at 2,325 metres.

You can reach Kühtai from Innsbruck in just 30 minutes – via Kematen into the Sellraintal valley and through the mountaineering villages of Sellrain, Gries and St. Sigmund. Or you can drive from Oetz in the Ötztal valley through the wild and romantic Nedertal valley.
